

# Pipefy

## The Low-code Business Process Automation Platform

### Solution Overview

Pipefy's secure, low-code platform for Business Process Automation is easy to deploy, configure, adopt, and scale. Pipefy's solution empowers Lines of Business leaders and process owners to solve simple to complex workflows while being secure and compliant. Pipefy aides Business Operations team in their digital transformation and drives productivity. The Pipefy solution is designed to be easy for the business to own, and secure enough for IT to approve.

### Typical Results

- 7200** hours saved per year

---

- 75%** reduction in process errors

---

- 200+%** Return on Investment (ROI)

---

- Rapidly realize value (<6 weeks)**

### Why Pipefy?

-  Empower Business Operations teams to "own" their applications and processes
-  Build a bridge between IT and the Business to solve business problems without increasing the IT Backlog
-  Solve business process issues faster for lower costs

### BASF Results

- 2400** hours saved through automation in one year

---

- 20** departments using Pipefy in BASF's Agricultural Solutions divisions in Latin America

---

- 1000%** user growth in one year

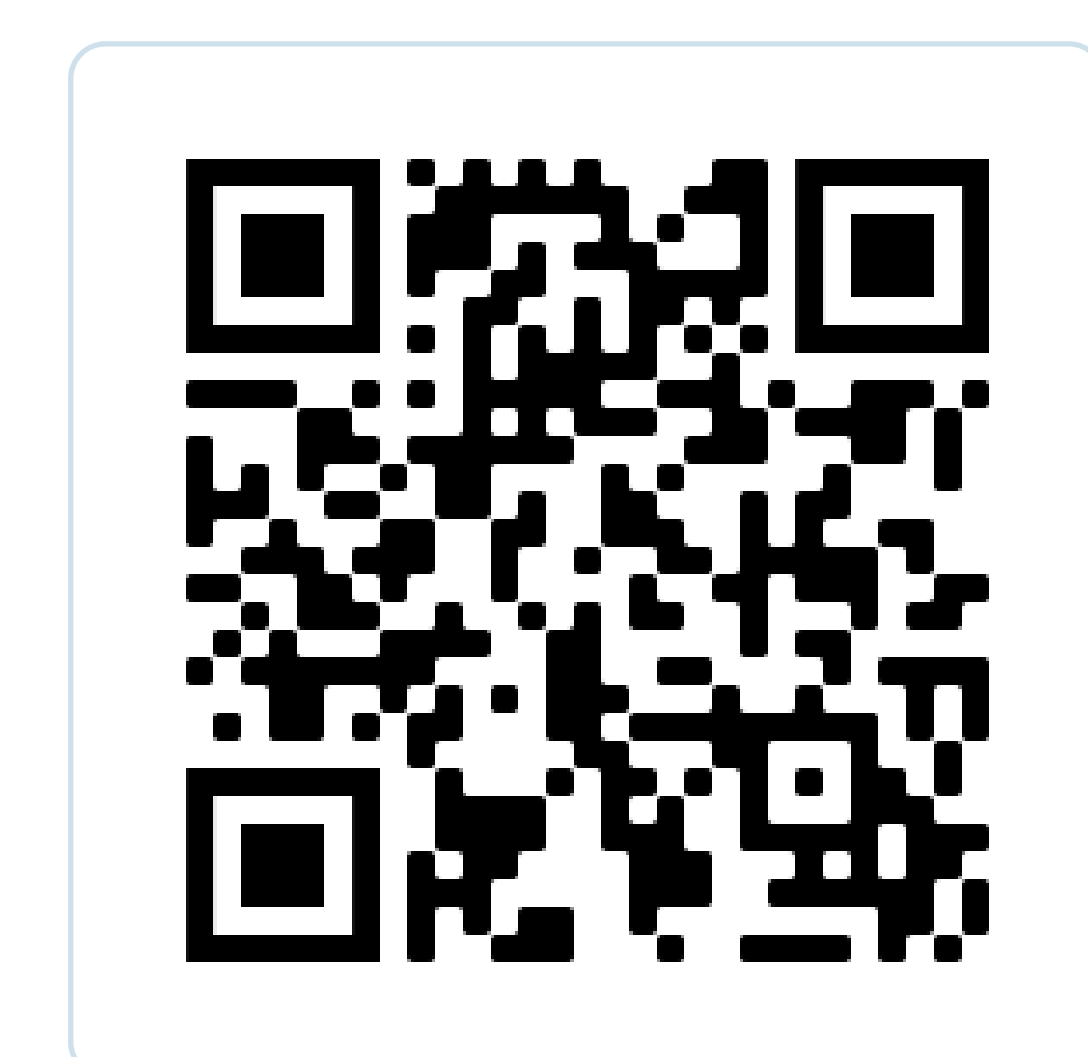

---

- 52** active processes managed

**“**Improving our processes in “robust systems” has always been challenging and expensive. Pipefy is changing that. It is a flexible tool that allows us to establish new processes and continuously improve the existing ones.”

Angela Miya, BASF LatAm Launch | Excellence Manager
